

MAGICPLUS 4200

MP4200 is a complete biometrics based identification that can function in the standalone mode without the need of a host PC or can easily integrate to a PC with the use of one of its TCP/IP or RS232 ports. When in the standalone mode, MP4200 functions as complete time attendance/access control system.

MP4200 can easily integrate with an online access control system by using its industry standard 26-bit wiegand port. MP4200 is physically stronger than other optic-based fingerprint recognition system in terms of shock resistance, scratch resistance, environment resistance etc.

Main Benefits

- ✓ Identification can not be stolen, lost or duplicated
- ✓ Saves cost on identification cards
- ✓ Software solutions to match your requirements
- ✓ Maintenance and support services
- ✓ Optional Electronic locks for wooden, aluminum or glass doors
- ✓ Can be integrated into existing time attendance and payroll systems

Features

- User capacity: 500/1000/1500
- Transaction Buffer: 50000
- Power: 9-24V DC, stay current: 0.50 mA, work current: 400 mA
- Identification time: ≤ 2 s
- FAR: $\leq 0.0001\%$
- FRR: $\leq 1\%$
- Electrocontrol: directness relay output 3A/12V DC or encrypt electrocontrol output
- Integration: integrate proximity reader (ID) or contactless smart card reader (Mifare)
- Keypad or display: LCD with 80 character and figure keypad, wireless doorbell
- Communication: RS232, RS485, TCP/IP
- Baud rate: RS232: 115200, RS485: 115200 TCP/IP (RJ45 interface)
- Verification mode: one to one or one to more
- Size: 82 (L) x 35 (W) x 180 (H) mm

Applications

- ◆ Time & Attendance
- ◆ Restricted Areas
- ◆ Office Blocks
- ◆ IT/Control Rooms
- ◆ Record Rooms
- ◆ Safe/Vault
- ◆ Banks and Industrial Premises
